

The items listed below are topics for the semester exam which is scheduled for Tuesday, May 22nd. You may use this list to prepare for the exam. We will have time in class to work on review and to ask questions May 15-17 (one block and one C day period for everyone).

The first version of the exam (which may still be edited) contains 165 multiple choice and matching questions from Chapters 13-30. The majority of questions come from chapters 28-29-30, over which you have not yet been tested. Materials from Chapters 13-27 are review items, which were covered throughout the semester.

Additionally, you would be given one essay question to answer (anticipated value of 20-35 points).

You may print this sheet, type on this sheet, or I will have some paper copies available in class. Some items on this sheet might be repeated—my apologies. Thank you!

Chapters 13-16
